

A UNIQUE PARTNERSHIP

The Office of Indian Energy & Economic Development, United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada, and United Tribes Technical College have entered into a partnership to deliver Energy Auditor Level II Training. We are seeking Native Americans who are unemployed or under-employed for an 18-week course that will train them to be an Energy Auditor.

WHAT IS AN ENERGY AUDITOR?

Upon meeting all requirements and graduating from the Native American Energy Auditor Training Course, students will be able to perform in-depth diagnostics and evaluations, along with creating Fuel Efficiency reports for the customer. The Auditor will be competent to perform various airflow tasks, including Blower Door and Duct-Blaster tests. The Auditor will also be trained to give recommendations and possible solutions for all problematic areas concerning energy inefficiencies and losses that are determined and reported.

Students will learn the proper techniques in performing a complete energy audit. There is now a great need for highly trained auditors that have the capability to perform detailed inspections and make cost effective recommendations on improving a home's efficiency.

United Tribes Technical College MISSION STATEMENT

"United Tribes Technical College is dedicated to providing American Indians with postsecondary and technical education in a culturally diverse environment that will provide self-determination and economic development for all tribal nations."

THE OFFICE OF INDIAN ENERGY AND ECONOMIC DEVELOPMENT

The Office of Indian Energy and Economic Development (IEED), Division of Workforce Development (477 Office), has implemented strategies that are making significant impacts on employment, training, welfare reduction and job creation. One strategy includes developing a national agreement with the skilled trades to provide certified training that leads to excellent employment opportunities.

Not only do these training and job placement programs provide opportunities for Indians and Alaskan Natives but they also ensure that jobs are being filled by qualified Americans. The progressive method of training and placement promotes our philosophy of workforce, not welfare.
